DMS Accelerator is a European Commission funded project designed to help startups in the European Union (and associated countries) grow their skills, connect with partners and investors and receive media and events exposure.

Over 6 months, 50 selected startups will receive training in key topics such as GDPR, Intellectual property, investment matchmaking & fundraising, legal training, and more. All delivered by leading experts in their fields.

In this document you will find the 50 startups selected for the third year of the project.

2021
ESTABLISHING
**Agricolus S.R.L**

**Making Agritech sustainable! Agricolus® makes agTech tools accessible to worldwide farmers.**

[aigrilus.com](https://aigrilus.com)

**Italy, 2017**

**Establishing**

**Sector:** Agriculture & Food, Artificial Intelligence

---

**HYDRAO**

**Innovative / Sustainable / Green**

Agricolus is an innovative startup working in Smart Farming sector, which provides its customers with a cloud applications ecosystem for precision farming with multiple purposes: disease awareness and forecasts, crop monitoring, decision support system for treatments and fertilizers, farm management and “end to end” traceability bringing valuable information to final users. The aim is to support farmers, agronomists and other agri-sector operators in optimizing agronomic practices by integrating skills and the most up-to-date data collection and analysis technologies.

---

**HYDRAO is on a mission to help make the world’s water smarter, for everyone.**

[pro.hydrao.com](https://pro.hydrao.com)

**France, 2015**

**Establishing**

**Sector:** Artificial Intelligence, Energy & Environment, Internet of Things, Smart Cities & Transport

---

**Water / Energy / Savings**

HYDRAO is a French water tech & data startup that provides smart demand-management solutions for water conservation and management. Our first solution is HYDRAO Aloé is the world's first smart shower. Our leading-edge Nudge technology enables significant water AND energy savings, especially in the Hospitality vertical. Our new smart meter solution HYDRAO Meter V2 will have AI/Machine-learning tools for usage-pattern data-capture and analysis, appliance signature identification and leak detection.
KASKO2GO

Making Technology-first approach for insurance farmers.

OutThink

We address the information security challenge from the People perspective.

OutThink, the world’s first Human Risk Management platform (SaaS), revolutionises security awareness training by measuring and understanding human risk, automating processes, and targeting phishing simulations and training, based on the security attitudes and behaviours of employees. Recognised by Gartner for its unique and innovative approach to security awareness training, OutThink is the highest rated solution in the January 2021 Gartner Peer Insights report.

Terabee

3D sensing solutions to capture scenes and movement for digital transformation.

Lidar / 3D Cameras / IoT

Terabee has built a portfolio of sensors and 3D digitalization tools encompassing hardware modules and software libraries. These allow us to rapidly enter target applications and generate valuable data for specific markets. These include People Counting solutions for Smart Buildings, Materials and Stock Volume monitoring for AgTech and Industrial Automation, and Mobile Robotics solutions for Industry 4.0.
ComeTogether

Our mission is to use cutting edge technology to tell B2B sales teams which company they need to target next.

Aithena.ai

Our mission is to use cutting edge technology to tell B2B sales teams which company they need to target next.

ComeTogether

ComeTogether gives control of the entire ticket lifecycle to event organizers, with the power of blockchain.

Aithena.ai

ComeTogether

Greece, 2018

Scaling

Sector: Blockchain

For sales people it is extremely boring and time-consuming to make a list of prospects. We automate this process by using AI to tell users which company to target based on their current client pool.
Dashbike aims to make cycling safe, and to digitize the planning of cycling infrastructure.

Cumul.io

Embed snappy, intuitive dashboards in your SaaS product.

Dashbike is the first and long awaited dashcam for cyclists with distance measurement, GPS, Gyroscop, daytime running lights, and many other sensors. Dashtrack is an innovative, unique and fast scaleable data platform to digitise cycling across Europe with Dashbike to make cycling safer. We record all relevant (cycling) traffic data of cyclists on a daily basis, including processing and analysis.
EyeVi Technologies is a geospatial AI-powered digital data production company. EyeVi aims to eliminate bottlenecks in predictive maintenance, traffic management and safety auditing with our on-demand mapping technology. We make road infrastructure digitization sustainable, cost-efficient and fast. EyeVi enables road consultants, asset managers and infrastructure operators to reduce their operating expenses with zero capital expenditure. We produce the data our clients need, to support their solutions and services.

Estonia, 2020

**Empowering Infrastructure Digitization.**

**EyeVi**

**Innovation / Digitalization / Sustainability**

EyeVi Technologies is a geospatial AI-powered digital data production company. **Linknovate Science S.L.**

Real heroism is transforming dreams in reality and ideas in facts.

Spain, 2014  
*Scaling*  
*Sector: Artificial Intelligence*

**JOGO**

Together we revolutionise the world of football and help youth players reach their full potential.

**Netherlands, 2020**  
*Scaling*  
*Sector: Artificial Intelligence, Internet of Things, Sport & Lifestyle*

**Track / Analyze / Improve**

At JOGO we love football and technology. So why not mix them up? By bringing data science, AI and machine learning (ML) into youth development, our favourite game becomes even better. JOGO makes discovering and optimising the best talents an easy goal.

JOGO's state-of-the-art data collection - driven by AI, machine vision and learning, sensor tech and much more - makes it possible to track physique, technique and cognitive abilities seamlessly. Clubs and trainers now can follow the progress of their players, while young talents can measure their growth - all in real-time.
**Owiwi**

Owiwi helps companies optimize their hiring funnels to change the way they attract, identify and select talents for a job position.

Assessment / Fun / Reliable

Owiwi is a fun and engaging psychometric tool that accurately measures candidate soft skills. Think of a combination of advanced scientific methodology packed within an immersive game that millennials enjoy taking part in. We take away the stress in the hiring process for the candidate while minimising / eliminating the recruiter risk of hiring the wrong candidate.

Digital / IP (Intellectual Property) / Protection
CADChain is a software development company that has a strong legal and technological background. Currently, we are concentrating on CAD (industrial design), additive manufacturing, trade secrets and legal-tech education/consulting. In general, CADChain is an umbrella of services that have the proprietary “geometric twin” technology behind them and are interlinked through different business models.
AyraDB is a next-generation database, 100% technology independent and with outstanding performance and scalability. AyraDB is unique as it provides sub-millisecond latency (i.e. response time) on disk. Currently, companies have to use in-memory databases to achieve sub-millisecond latency. Storing data on disk reduces the cost of data management by a factor of 20 and makes AyraDB a disruptive technology.

Obtaining scalability at a fraction of the cost unlocks business benefits in a number of use cases. It reduces the barriers to entry for SMEs in data-intensive businesses, it enables new business models based on the exploitation of large datasets, it helps ensure the success of independent players in the data market and it is environmentally sustainable. Compared to top competitors, the performance edge of AyraDB reduces hardware costs and energy consumption by a factor of 20.
The Customer journey does not end with the sale or delivery of a product, in fact that is where it enters into its most important step of the lifecycle. Delloop understands this and helps the Retailer take advantage of it.

By capturing the moments of truth across the entire lifecycle; sale, delivery, usage, warranty and indeed disposal in a closed-loop Delloop opens up a wealth of insights for the Retailer to discover, understand and improve the customer experience and of course, profit.

It just makes sense to be there when your customer needs you.

Dativo

Simple, scalable, ultra fast and efficient Digital Rewards Platform.

Digital Rewards / Payments / Scalable

Dativo provides an API-first platform with real time capabilities that delivers digitally rewards to customers at 1/10 of the cost. We provide to corporates and brands the possibility to deliver instantly non cash payments to customers in a simple, scalable and efficient way, with a simple click.

**France, 2015**

---

**Validating**

**Sector:** Internet of Things, Retail, Smart Cities & Transport

---

**Indoor-tracking / Operations / Cross-sector**

We provide our clients with an infrastructure-free tracking solution to follow, analyse and support their operations on site. Our main focus is on logistics and retail at the moment because they share a common strategic use case: picking operations.

No need of beacons or other hardware in buildings to track activity and assets.

---

**Green / Wildfires / Sensors**

Dryad develops Silvanet, a large-scale, distributed sensor network for ultra-early wildfire detection and continuous health monitoring of the forest. The solar-powered gas sensors use embedded AI to detect wildfires within 60 minutes. With reduced reaction time for wildfires, Dryad helps to protect the world’s largest carbon sink, addressing deforestation and emissions from forest fires which cause up to 20% of global carbon emissions. Dryad will also mitigate the economic damages caused by wildfires, estimated to be at $140bn per year, tapping into a substantial market potential with insurances as well as private and public forest owners.
